

Canyons Traumatic Brain Injury (TBI) Consultation Team

Traumatic Brain Injury Consultation Services are available by a multidisciplinary team for a student who has experienced a traumatic brain injury. The services may be provided prior to the student's return to school, during their reentry period, and/or after a return to school.

Each school's Student Intervention Team and/or Special Education Team should be the initial point of contact for student, parent, and hospital personnel seeking supports and services for a student who has experienced a traumatic brain injury. School teams are encouraged to consult with the TBI Consultation Team as any need arises. The TBI Team would be uniquely qualified to assist with helping school personnel better understand the medical data, prognostic outcomes and timelines to recovery, the formulation and implementation of educational modifications and accommodations, and the development of 504 Accommodation Plans, Individualized Education Plans (IEP) and/or Individual Health Care Plans, if/as needed.

The Canyons TBI Team members include:

Lane Valum, Ph.D., School Psychologist, District Office,
801-826-5163, lane.valum@canyonsdistrict.org

Stacey Graziano, M.S., School Psychologist, CSD Pre-School Programs,
801-826-5077, stacey.graziano@canyonsdistrict.org
