### Head Injury Notification

Date \_\_\_\_\_

Dear Parent/Guardian,

Your child \_\_\_\_\_, sustained a head injury at school today. The following is for your information.

Most head injuries do not result in serious consequences. However, careful observation of the child during the first two days after a head injury is extremely important for recognizing complications.

If your child has any of the following symptoms, you should notify your health care provider immediately.

- Headache (if it is long lasting and increases in severity)
- Unusual drowsiness, irritability, or inability to awaken the child
- Slurred speech, confusion or memory loss
- Persistent nausea and/or vomiting
- Dizziness, weakness, difficulty with balance, or numbness
- Bruising around eyes or ears
- Clear fluid or blood coming from the nose or ears
- Visual disturbance or inequality of the pupil size
- Convulsions or seizures

If you have any questions or concerns please contact your health care provider.
